INVENTA-FISCHER AG again successful in China

The Swiss Engineering Company INVENTA-FISCHER AG (formerly EMS-INVENTA AG) – a member of the EMS-group which is active in the field of performance polymers, fine chemicals and engineering – has been awarded a further contract from China.

The contract covers the supply of a complete plant for the production of polyester chips, having an annual capacity of over 150'000 tons (1 production line) which is a considerable expansion of the existing polyester plant. The plant will be operated by KAIPING POLYESTER ENTERPRISES GROUP Co. Ltd. at Kaiping, Guangdong Province.

INVENTA-FISCHER AG will perform the design and engineering work, provide the technology and supply the machines and equipment. Additionally, INVENTA-FISCHER AG will delegate its specialists for the supervision of the erection work and the commissioning of the plant.

The value of this order is estimated at CHF 47.0 mio. The plant location is Kaiping City, Guangdong Province. Start of production is scheduled for the 3rd quarter of 2001.

INVENTA-FISCHER AG has already designed and delivered 10 industrial plants for the manufacture of synthetic fibres to this company.
